New Energy Batteries

The Company’ s new energy batteries are mainly lithium-ion batteries, and also involve the production and R&D of next-generation battery products such as fuel cells. The application fields of lithium-ion batteries are mainly divided into two categories: power applications and non-power applications. Among them, power applications include electric light vehicles, electric passenger cars, and electric commercial vehicles, whereas the non-power applications include consumer electronics and energy storage.

Renewable New Materials

Tianneng actively fulfills the producer’ s extended obligation to recycle metals, plastics, residual acids and other substances in used batteries.

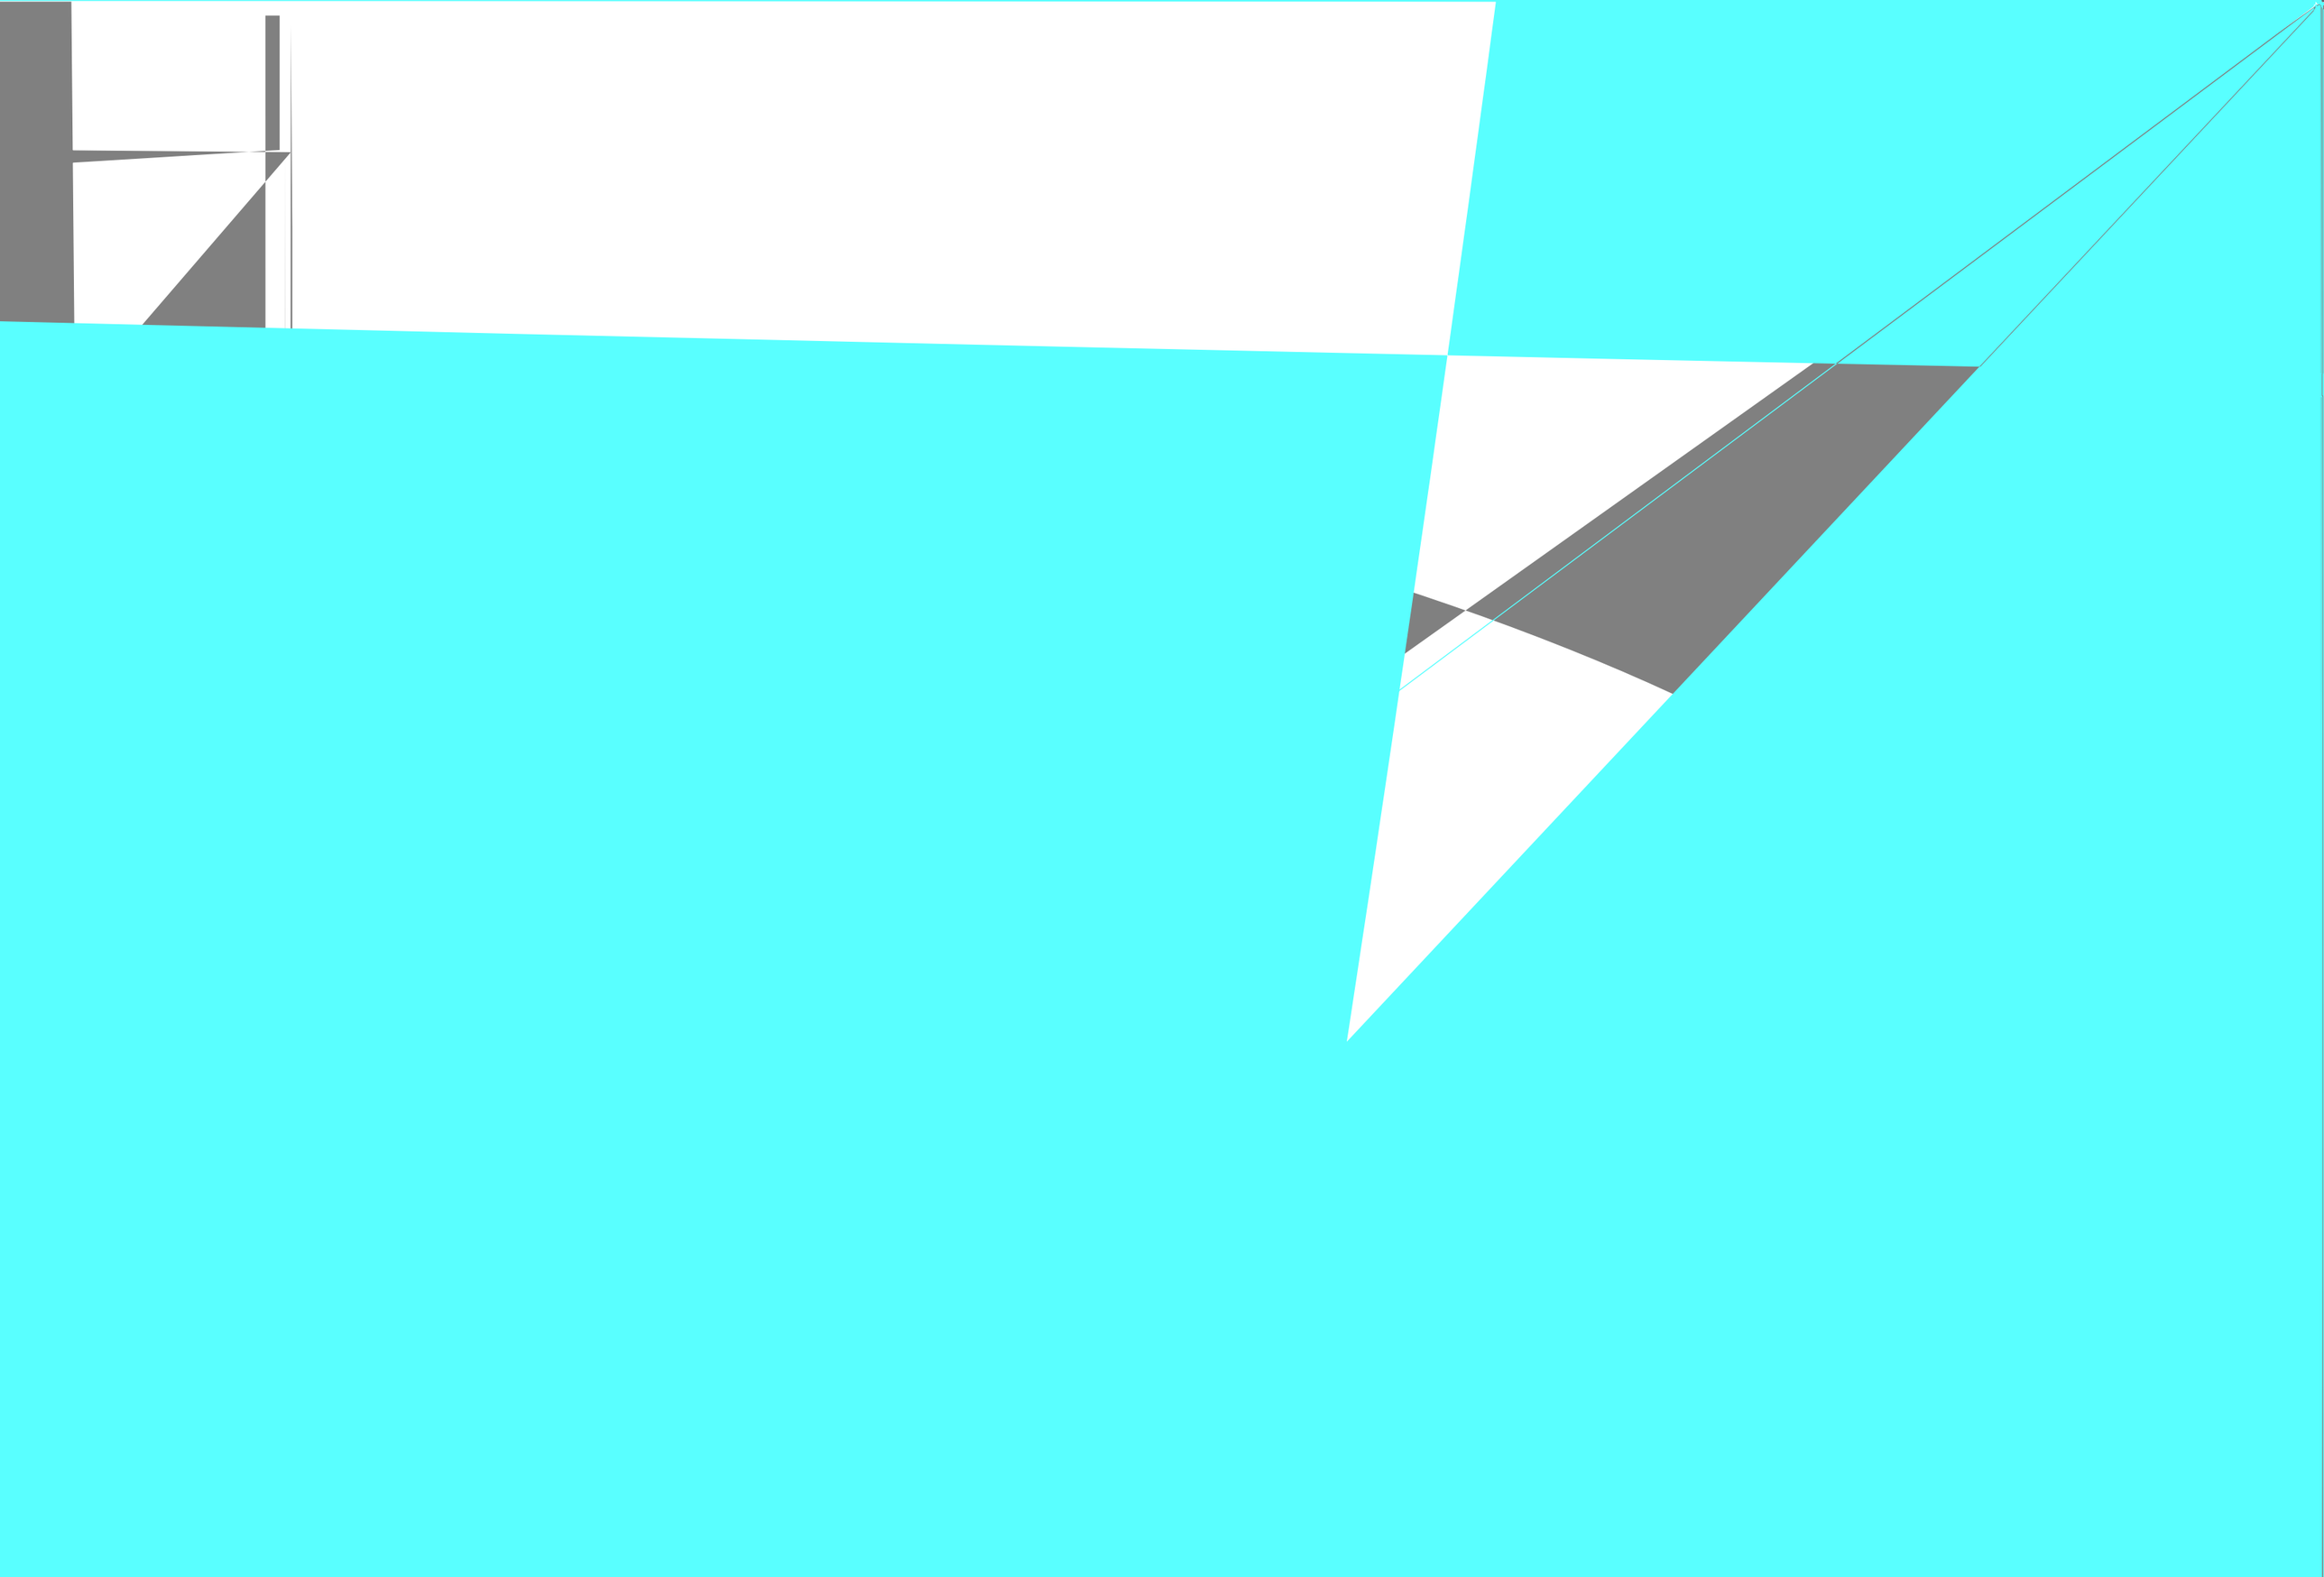
State of Operation

In 2020, in the face of the complex and severe macro situation, industry trends, and the impact of the COVID-19 epidemic, the Group adhered to the keynote of “ seeking improvement in stabilization ”, coordinated the prevention and control of the epidemic and production and operation, and vigorously implemented the development strategy of “ intelligence, platform and globalization ” to continuously maintain high-quality and steady development.

In 2020, the total assets of the Group reached RMB 23.2 billion , with an increase of 21.3% over the previous year; the profit attributable to shareholders was RMB 2.48 billion, with an increase of 47.3% over the previous year.

During the year, the Group has actively responded to the ever-changing external situation and market environment, overcomed the challenges posed by the epidemic, seized opportunities and optimized strategies, which further enhanced our pattern of high-quality development. The Group places priority on the health and safety of its employees with improving its competitiveness in the industry as its core focus, consolidates the achievements of epidemic prevention and control, and pays close attention to its business objectives. In addition, the Group is committed to the R&D and the use of new technologies, new processes and new materials to fulfill the needs of di erent markets and customers, and thus its operating performance has improved gradually. The Group ranks 15th among the top 500 global new energy enterprises, 147th among the top 500 Chinese enterprises, 16th among the top 500 Chinese private manufacturing enterprises, and first among the top 10 enterprises in the Chinese light industry battery industry.



“ ” Tianneng-styled “Epidemic” Prevention: Big Love, Big Responsibility

2020 w Ỳ ˢ

The year 2020 is an extraordinary year. The Group has firm confidence and united e orts to dedicate to the following missions: while coordinating the epidemic prevention and control and the production and operation activities, we actively assumed social responsibilities and contributed to the fight against the epidemic with practical actions, which has drawn the attention of the mainstream media such as People’s Daily, the Xinhua News Agency, Guangming Daily and China Youth Daily, with about 80 relevant articles.

With benefit-linkage development to assist industrial projects, the Group is also actively carrying out consumption-driven poverty alleviation work.

2019 1 2020 5

10

From January 2019 to May 2020, Tianneng Group Taijiang Company in Guizhou Province invested about RMB 100,000 in the consumption-driven poverty alleviation funds to purchase agricultural and sideline products such as rice, watermelon, mushrooms, loquat and farmed chicken and beef grown and raised by the surrounding villagers, solving the problem of unsalable agricultural and sideline products of local poor farmers.

2020 3 3

On 3 March, 2020, the People's Government of Guizhou Province issued an announcement o cially approving Taijiang County to withdraw from the list of state-level poverty-stricken counties. Tianneng has made due contributions to the poverty alleviation work in Taijiang County.

2020 5 9

On 9 May, 2020, Tianneng cooperated in establishing the Poverty Alleviation Industrial Park project in Guizhou Province.

Village-Enterprise Joint E orts in Rural Revitalization

Xinchuan Village in Meishan Town, Changxing County, Zhejiang Province

2008

" "

10

Since 2008, the Group has paired up with Xinchuan Village, Meishan Town, Changxing County to blaze a new trail of rural revitalization of " industry feeding agriculture " through village-enterprise joint construction. With the Group as the leader, it has promoted the coordinated development of more than 10 supporting enterprises and modern service industry in the village. The villagers rely on the village-enterprises co-construction platform to achieve common prosperity.

Tianneng participated in the environmental improvement and greening of Xinchuan Village, and funded the cultural public welfare undertakings in the village with an accumulative donation amount of more than RMB ten million, which injected vitality into the creation of the boutique village of Xinchuan Village.

Media	Meet-And-Greet, Press Conference, Oriented Communication, Interview
Community	Participation in Activities, Joint E orts to Build and Share, Public Benefit and Charity
Government	Participation in Conference or Sending Invitation to Join Conference, Projects Negotiation, Business Communication, Government A airs Contacts

Internal Control

Independent Audit

The Group has set up the Audit Supervision Center, an independent audit institution directly led by the chairman of the Board, formulated the audit supervision management related systems, and clarified various audit processes. The Audit Department independently conducts internal management audits and special audits of the Group, without any intervention or restrictions from other departments.

The Group also hires ZHONGHUI ANDA CPA Limited to provide the Group with related audit services such as auditing of accounting statements and verification of net assets. The results of external audit are reported directly to the Board by the firm’ s sta , which not only strengthens the internal risk management of the enterprise, but also e ectively avoids the occurrence of violations of laws and regulations.

Risk Monitoring

The Group’ s risk control framework is as follows:

Role	Person in Charge	Duties
Top-down identification and management of company-level strategic and business risks	Board (through the Audit Committee and Audit Supervision Department, etc.)	Monitor the Company's risk management policies and procedures. Determine the nature and degree of possible and emerging risks. Assess and publish risk management and internal control systems and ensure that all processes are properly implemented. Regularly organize the management sta of middle-level and above to study the Listing Rules of the Stock Exchange.

Security and Environmental Protection System

In 2020, the Group normalized risk management and control, comprehensively boosted in-depth safety construction, which further ensured the good momentum of high-quality development. The relevant measures included: establishing a three-level inspection mechanism of " Second-level company self-inspection and self-correction + business department supervision and inspection + group supervision and control ", launching an internal control risk system, integration of safety and environmental information, construction of a safety and environmental system process system, organization of hierarchical risk management and control and hidden danger investigation and management, through the compilation of risk maps in key areas, precise management of production sites, and special trainings and education activities for liaison o cers. We have realized self-pressurization, fundamentally eliminating hidden dangers of accidents, and vigorously improving the intrinsic safety of the Group.

Over the past year, the Group has consolidated the foundation for environmental protection and security. We strengthened the safety bottom line awareness and environmental protection red line thinking, integrated internal high-quality resources, and further consolidated the foundation of environmental protection and security compliance with policy analysis, mechanism optimization, management empowerment, supervision and inspection, etc. as e ective means.

At the same time, the Group initiated the construction of an internal risk control system to drive contract management and seal management upgrades with digitalization, further reducing operating risks. We conducted inspections on the project bases, discovered hidden dangers in time, and urged the rectification to be implemented; during the inspection on operations management, we conducted various audits, and recovered more than RMB 20 million in direct losses. For the development of new industries, new platforms and new businesses, from the initial investment and research of projects to the final operations, we implemented the whole-process and all-around control to ensure stable operations.

;

;

The Group also continued to optimize the grid management system, organize special trainings and education activities for liaison o cers, greatly improving the risk identification capabilities of the part-time team; we continuously solidified the daily supervision and operation mechanism, and further improved the risk prevention and control and emergency response capabilities; the assessment mechanism was established, so that in response to sudden and mass incidents, public crises, major business risks, etc., which cause damage to the Group' s economy or brand, a one-vote veto was applicable for the principal responsible person. The in-depth advancement of the joint construction mechanism of the government-enterprise cooperation has formed a strong joint force of upper and lower linkage and coordinated advancement.

..., the metal recovery rate of waste batteries can
...ach over 99%, the plastic recovery rate is 99%, and the residual acid recovery rate is 100%.

In 2020, the Group further accelerated the national layout of the large-scale recycling business. At present, the Group has obtained the qualification for recycling pilot projects in 15 provinces, and the country' s largest waste battery " recycling cloud " platform has been put into operation, and a new pattern of circular economy development has been fully established. At the same time, lithium battery recycling was put into operation on schedule, achieving an endless cycle of production and recycling, and the Group has become a whitelisted company for lithium battery recycling of the Ministry of Industry and Information Technology of the PRC.

Tianneng attaches great importance to the protection of water resources and actively promotes the recycling of water resources. It adopts the advanced reclaimed water reuse technology to automate the post-treatment of industrial wastewater after precipitation, repeated osmosis and purification, and then recycling. The treated industrial water meets the national secondary municipal water standard and can be used for watering flowers and fish farming, truly turning waste into treasure and realizing the unification of economic, social and environmental benefits.

"
"
Tianneng was rated as a " National Circular Economy Technology Center ".
